## DEKLARACJA ZGODNOŚCI

Nazwa Producenta: P.P.H.U. JUNA Andrzej Jaborski  
Nazwa Urządzenia: Moduł odbiornika radiowego DAB / DAB +  
Typ / Model: JRDAB-04

Producent deklaruje zgodność wyrobu z następującymi dyrektywami i normami:

|                                    |                                                                                                                                                                                               |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dyrektywa 2014/53/EU               | RED                                                                                                                                                                                           |
| ETSI EN 303 345-4 V1.1.0 (2019-11) | Broadcast Sound Receivers; Part4: DAB broadcast sound service;<br>Harmonised Standard for access to radio spectrum                                                                            |
| ETSI EN 303 345-1 V1.1.1 (2019-03) | Broadcast Sound Receivers; Part1: Generic requirements and measuring<br>methods                                                                                                               |
| PN-EN 55032:2015-09                | Electromagnetic compatibility of multimedia equipment<br>- Emission Requirements                                                                                                              |
| ETSI EN 301 489-1 V2.2.3 (2019-11) | ElectroMagnetic Compatibility (EMC) standard for radio equipment<br>and services; Part 1: Common technical requirements;<br>Harmonised Standard for ElectroMagnetic Compatibility             |
| PN-EN 50498: 2011                  | Electromagnetic compatibility (EMC) - Product family standard for<br>aftermarket electronic equipment in vehicles                                                                             |
| ISO 10605:2008                     | Road vehicles — Test methods for electrical disturbances from electrostatic discharge.                                                                                                        |
| ISO 7637-2: 2011                   | Road vehicles — Electrical disturbances from conduction and coupling — Part 2:<br>Electrical transient conduction along supply lines only.                                                    |
| ISO 7637-2: 2004 +AMD. 1: 2008     | Road vehicles — Electrical disturbances from conduction and coupling — Part 2:<br>Electrical transient conduction along supply lines only.                                                    |
| ISO 7637-3:2007                    | Road vehicles — Electrical disturbances from conduction and coupling — Part 3:<br>Electrical transient transmission by capacitive and inductive coupling<br>via lines other than supply lines |
| ISO 16750: 2012                    | Road vehicles — Environmental conditions and testing for electrical and electronic<br>equipment — Part 2: Electrical loads.                                                                   |

Laboratorium testowe:

LKE PWR (Wrocław, Poland) 031/K34/D/2020 issued on 09.12.2020  
LKE PWR (Wrocław, Poland) 035/K34/D/2020 issued on 09.12.2020
